ABOUT ME

I am a student in a preparatory class in business, which takes most of my time, but on the side I have many centers of interest. I really like **cinema, literature and sports**: I played tennis for most of my life. I am also very fond of cooking, which relax me. School is taking a lot of time in my everyday life, but I don't mind since I learn a lot of things I'm interested in, it also helps me to **build discipline**, which is really fulfilling. I think my personality is quite **dynamic**, I am always **willing to discover new things**, create and learn. I love to travel and try to everytime I got a chance.

WHAT I EXPECT FROM MY ERASMUS EXPERIENCE

- **For my development as a student/ professionnall aspect**

Being a student in Geopolitics, the IFALL internship is really interesting for me, since it approaches the topic of multiculturalism, integration and assimilation. Obviously, it is making my internship deeply related to the courses I'm following in school. Also, the work I will do in Erikshjälpen, a second hand shop, will allow me to learn more about the sales world, through more of a practical aspect than what I am used to, since the studies I am pursuing are much more theoretical.

- **For my improvement as an individual/ personnal aspect**

As I said, I really like going out of my comfort zone and for me, applying to an Erasmus mobility in Sweden was an opportunity to do so. I expect from this experience to meet new people, also getting to know a new culture, new habits and landscapes of a country I didn't knew much of before I arrived. Also, both internship are defending values that I am aligned with: openness to different cultures (in the case of IFALL) and recycling, donations and globally ecological values (for Erikshjälpen)
